## Wisdom in Leadership

A significant opportunity to maximise your impact in your world

Most of us will find ourselves wondering how we got where we are. Some of us will consider what

we will do next, but few of us consider who we want to become. Sometimes serious, sometime hilarious, we will explore these aspects of life. The goal is to find your deeper self. That might seem a strange concept to apply to the workplace, but if you are going to become an effective leader, it does help if you know where you're going. Your people need your grounded strength. They will look to you to be the buffer in the storm. Some people we meet in life are about as deep as a puddle! You won't be that person!

**This down to earth, practical, course aims to make you more effective**

**To get where you want to go:**

We'll take time to take stock. Through a couple of simple and engaging exercises you will see yourself in a whole new light.

**Keeping true to your Goals:**

We'll help you define what matters and how you keep to your agenda. Look up from your feet and see the future opening out

**Growing the soul:**

This is not as mysterious as it sounds. We will learn lessons from significant people who have changed the world, where they were. What you believe is not shown by what you think, but is shown by your life.

**Getting it right:** How do you balance your life and how do you become a more significant person? We will look at how spirituality can enrich and empower your life and work.

WE ALSO OFFER ONE TO ONE COACHING FOR MANAGEMENT AND DIRECTORS
